---

## Facilitator

**Brett Ramirez**

**Director - Emerging Technologies  
Diagon Consulting Ltd.**

Brett is a seasoned Information Technology (IT) implementation consultant/integrator as well as IT risk professional with over 25 years serving and delivering IT projects to both the private and the public sectors including the oil and gas, manufacturing, hospitality, financial services, and telecommunications industries.

Brett currently holds the position of Director of Emerging Technologies at Diagon Consulting and leads the development of newtech for both automation as well as the cybersecurity space. Prior to this, he was one of the lead technology consultants at a big 4 organization where he wore two hats – firstly leading an IT risk team including IT security professional as well as process and technology consultants in IT advisory space.

Brett led a team in building the first Managed Security Operation Centre (MSOC) in Trinidad focused on the provision of 24x 7 x 365 Monitoring, Detection & Response (MDR) services as well as a suite of cybersecurity offerings including Breach & Attack Simulation (BAS), Data Loss Prevention, Cyber Response including ransomware negotiations and investigations, Phishing, User behavior analytics, mobile and other application security, Operational Technologies (OT) security, Threat analysis and threat hunting, user awareness training etc. He is also certified in business resilience designing and deploying various toolsets including - mass notification and disaster recovery solutions.

Brett has provided advice to regional and international organizations around cybersecurity topics including proactive approaches to cybersecurity, deception analysis, board and executive management responsibilities etc.
